SUMMARY

Junior Software Engineer with hands-on experience building full-stack applications through academic and personal projects. Skilled in C#, .NET, SQL, React, Angular, Node.js, and MongoDB, with a strong foundation in frontend and backend development. Familiar with Azure, REST APIs, Git, and modern web development practices. Currently seeking a junior software engineering role with a focus on .NET development.

SKILLS

Programming Languages: C#, JavaScript (ES6+), TypeScript, SQL, Java, HTML5, CSS3
Back-End: .NET, ASP.NET Core, Entity Framework Core, Node.js, Express.js, RESTful APIs
Front-End: React, Angular, Vite, Tailwind CSS, Bootstrap, Responsive Web Design
Databases: SQL Server, MongoDB
Testing & Tools: Debugging, QA Automation, Postman, OOP, CRUD, JSON, API Integration
Cloud & DevOps: Microsoft Azure, Azure App Service, Azure SQL, Git, GitHub
Languages: English (Professional Working Proficiency), German (currently learning)

PROJECTS

Car Rental – Full Stack Web Application car-rental-beta-sooty.vercel.app

- Built a full-stack booking platform with reservation management, search filters, and responsive UI components translated from Figma mockups.
- Used React (Vite) + Context API for state management; integrated REST API (Node.js & MongoDB); performed end-to-end debugging across all application flows using Git.

BurgerShop – Full Stack Food Ordering Application burger-shop-blond.vercel.app

- Built a full-stack food ordering application with product and category management, shopping cart, checkout flow, order tracking, and a responsive customer and cashier dashboard.
- Developed a RESTful API using C# and ASP.NET Core with Entity Framework Core and SQL Server; built the frontend with React, Vite, Tailwind CSS, and Axios, with deployment using Microsoft Azure and Vercel.

Watch E-Shop – E-Commerce Interface seiko-mod-rho.vercel.app

- Built a responsive e-commerce application for customizable watches, featuring product browsing, watch configuration and editing, shopping cart functionality, and a responsive UI/UX.
- Developed the frontend with React, Vite, and Tailwind CSS; implemented cart state management using React Context API and designed reusable components for a responsive shopping experience.

EDUCATION

Athens University of Economics and Business (AUEB)
BSc in Computer Science — 4th Year Student

CERTIFICATIONS

- **QA Automation** — LinkedIn Learning
- **Complete Modern Front-End Development** — Udemy (HTML, CSS, Bootstrap 5, React.js, Angular)
- **SQL Essential Learning** — LinkedIn Learning
- **Building RESTful APIs with Node.js & Express** — LinkedIn Learning
